JOYDEEP PAUL
Jr. Web Devloper

Creative Frontend Developer with expertise in React, JavaScript, HTML, CSS, and modern UI libraries, building responsive and engaging web applications. Currently advancing backend skills with Node.js, Express, and MongoDB to transition into a versatile Full-Stack Developer. Dedicated to delivering innovative, user-focused digital solutions.

PROJECTS

DEVELOPER's PORTFOLIO

React Js, SupaBase, Lenis, ScrollTrigger

- Developed a full-stack developer portfolio designed to highlight my frontend development skills and streamline client project inquiries.

- Implemented Supabase for secure, scalable data management. Leveraged Supabase's real-time capabilities to ensure instant updates for client inquiries and portfolio interactions.

- Integrated GSAP ScrollTrigger and Lenis to create smooth, high-performance scrolling animations and enhance overall user experience.

ART GALLERY

React Js, Tailwind, ScrollTrigger, Lenis

- Developed a visually rich Awwwards-style website to demonstrate advanced frontend capabilities, focusing on modern design patterns, micro-interactions, and smooth user experience.

- Built using React.js, Tailwind CSS, Lenis, and GSAP ScrollTrigger, implementing fluid page transitions, smooth scrolling, parallax effects, and scroll-based animations for a high-end interactive feel.

Backend Development

MongoDB, Express Js, Node Js

I am currently focusing on strengthening my skills in Backend Development, working with Node.js, Express.js, and MongoDB to build powerful and scalable applications. My learning includes designing secure RESTful APIs, handling authentication and role-based access, managing databases efficiently, and integrating server-side logic with frontend technologies. By practicing real-world projects, I aim to become a proficient MERN stack developer capable of creating complete, production-ready solutions that deliver excellent user experiences.
