SUMMARY

Frontend Developer with hands-on experience building responsive, modern, and interactive web applications using React.js, JavaScript, TypeScript, Tailwind CSS, GSAP, and Framer Motion. Experienced in developing reusable components, integrating REST APIs, managing application state, and implementing smooth animations and responsive UI designs. Along with strong frontend expertise, I have working knowledge of Node.js, Express.js, MongoDB, authentication, and backend API development. Passionate about writing clean, maintainable code and building scalable applications with a strong focus on performance, usability, and user experience.

SKILLS

- ✓ **Languages:** JavaScript (ES6+), TypeScript (Working Knowledge), HTML5, CSS3
- ✓ **Frontend:** React.js, React Hooks, Redux, Redux Toolkit, Context API, React Router, Component Architecture, Reusable Components, Responsive Web Design, SPA Development, Tailwind CSS, Bootstrap, Framer Motion, GSAP
- ✓ **Backend:** Node.js, Express.js (REST API Development) [Working Knowledge]
- ✓ **Databases:** MongoDB, Supabase (Backend-as-a-Service)
- ✓ **Tools & Platforms:** Git, GitHub, Vite, VS Code, Postman, NPM, Netlify, Vercel
- ✓ **Concepts:** REST API Integration, State Management, Performance Optimization, Lazy Loading, Cross-Browser Compatibility, Responsive, Version Control (Git Workflow)

EXPERIENCE

Frontend Developer Intern | *Unified Mentors* | March 2026 – June 2026 (3 Months)

- ✓ Built responsive React.js user interfaces using reusable, hook-based components, collaborating with designers and backend developers in an Agile team workflow.
- ✓ Integrated REST APIs for dynamic data rendering and implemented client-side state management to keep UI consistent across views.
- ✓ Improved application performance by optimizing component re-renders and fixed cross-browser/cross-device UI issues, contributing to a smoother user experience.

PROJECTS

AI Powered Appointment Booking Platform [NEUROCARE] | *React.js, Redux Toolkit, Tailwind CSS, Framer Motion, GSAP*

- ✓ Healthcare platform with 3 roles Patient, Doctor, and Admin featuring role-based access and appointment management.
- ✓ Integrated the **Groq API** to power an AI assistant for 2 core capabilities: doctor recommendations based on illness/location and preventive healthcare guidance.
- ✓ Implemented **Email OTP & Google OAuth** with secure authentication and personalized profiles.
- ✓ Developed an admin-controlled appointment workflow covering 3 stages - request, admin approval, and confirmation preventing doctors from accessing unapproved appointment requests.
- ✓ Implemented A4 prescription PDF generation, Cloudinary avatar management, medical history, patient profiles, and AI chat persistence using MongoDB.

Developer Portfolio | *React.js, Supabase, Tailwind CSS, React Router, GSAP*

- ✓ Designed and built a fully responsive personal portfolio website with client-side routing (React Router) to showcase projects, technical skills, and contact information.
- ✓ Integrated Supabase for secure data handling and dynamic content management, enabling real-time content updates without redeployment.
- ✓ Followed component-based architecture best practices to build modular, reusable UI components across the site.

EDUCATION

Masters of Computer Application (MCA) | Amity University [Online] | 2026 – 2028 | Software Engineering

Bachelor of Computer Application (BCA) | Kazi Nazrul University | 2022 – 2025 | Fullstack Web Development, DataBase Management System

Higher Secondary (Class 12) CBSE 2022 | **Secondary (Class 10),** CBSE 2020
