---

## SUMMARY

**Frontend Developer** experienced in building dynamic web applications using **React.js**, **JavaScript (ES6+)**, **Tailwind CSS**, and modern frontend tools. Strong understanding of **component-based** development, **REST API integration**, **responsive design**, and **performance optimization**. Committed to writing scalable and maintainable frontend code.

## SKILLS

- **Technical Skills:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Familiarity:** MongoDB, Supabase (Backend-as-a-Service), Express Js (Basics)
- **Tools** : Git, GitHub, VS Code, Postman, Vite, NPM

## PROJECTS

### Note Management System

- Developed a responsive note management interface using React.js and Tailwind CSS with a clean, user-friendly dashboard layout.
- Implemented dynamic CRUD operations through REST API integration with efficient state management.
- Built reusable React components with structured component-based architecture for better scalability. Optimized performance using lazy loading and smooth animations with Framer Motion and GSAP.

### Developer Portfolio

- Designed and developed a fully responsive personal portfolio website to showcase projects, technical skills, and contact information.
- Integrated Supabase for secure data handling and dynamic content management.
- Implemented reusable, modular React components following component-based architecture best practices.

### WhatsApp - Clone

- Designed and developed a responsive real-time chat interface using React.js with modern UI principles.
- Implemented dynamic message rendering with real-time updates for seamless user interaction.
- Built protected routes and managed user sessions on the frontend for secure navigation.
- Ensured mobile-first responsiveness and optimized UI performance for smooth messaging experience.

## EDUCATION

### Bachelor of Computer Application (BCA) (2022-2025)

Kazi Nazrul University (2022 - 2025)

- Relevant coursework in Web Development.
